

Vaishali

Bachelor of Computer Application

Batch of 2022 - Present

MAIMT, Kurukshetra University

C/C++

HTML

CSS

JavaScript

React

NodeJs

ExpressJs

MongoDB

An aspiring software engineer passionate about problem-solving and creating practical solutions. My web development experience comes from studies and projects, and I'm eager to learn more. I enjoy challenges, staying updated with tech trends, and seeking opportunities for meaningful projects.

PROJECTS

To-Do Dashboard

MongoDB

ExpressJs

React

NodeJs

Developed a Task Management Dashboard using React, Node.js, Express.js, and MongoDB, designed to simplify the task organization. The dashboard allows users to do Dynamic Task Management like Add, update, and delete tasks effortlessly, Organize tasks into three categories: "To Do," "In Progress," and "Done", Track progress visually and users can also move tasks between categories with drag-and-drop. A responsive and clean interface ensures accessibility across devices.

E-Commerce

EJS

CSS

JavaScript

NodeJs

ExpressJs

MongoDB

I developed an E-Commerce website using JavaScript, Node.js, Express.js, EJS, CSS, and MongoDB, providing a seamless shopping experience. Users can sign up, log in, browse products, view details, add items to their cart, and place orders effortlessly. Admins and sellers can add, edit, and delete products, while admins can also manage users by activating or deactivating their accounts to control access. The platform is designed to be user-friendly for customers and administrators.

Resume Builder

React

This is a success message.

Resume Builder web application, built using **React.js** (Hooks, Context API), helps users create personalized, professional resumes. It features an easy-to-use interface with sections for **Basic Information, Education, Projects, Work Experience, and About Me**, allowing users to customize and build their resumes seamlessly. It is designed to help users create professional resumes effortlessly.

Discussion Portal

HTML

CSS

JavaScript

Developed a discussion portal using JavaScript, HTML, and CSS. This platform allows users to engage in conversations by adding questions, answering others, and searching for topics. Users can interact with answers through likes and dislikes, fostering a collaborative environment for sharing ideas and knowledge in a community-driven space.
